

EQUIPMENT FOR INDUSTRIAL APPLICATIONS: PLANNED VISIT - INSPECTION - RECERTIFICATION

THE FOLLOWING SERVICES ARE ONLY AVAILABLE IN FRANCE

LOADING ARM & F.C.E RAILWAY (ACME/ISO) COUPLING SERVICES

Your equipment is checked in accordance with the manufacturer's or your own requirements:

- Installation / Removal
- Visual Examination
- Dismantling & assessment
- Repairs
- Equipment & documentation updates
- Renovation
- Modifications

- We inspect the following equipment:

- Loading arms
- F.C.E Railway couplings for railcars & LPG trucks
- High & Low Pressure equipment (swivel joints, butterfly valves...)

- We provide you with:

- Spares parts
- Maintenance contract
- Planned visits
- End-user staff training
- An equipment follow-up if required

- We offer you:

- The know how of our Technical teams
- A complete range of gauges / "suitcase" kits for wear checks and thread compatibility checking by yourselves
- The efficiency and reactivity of our team
- Procedures approved by BUREAU VERITAS

Our following is our process mode:

- A visual examination is made to classify the equipment
- A complete inventory of “out of service” equipment is established
- The equipment is completely dismantled and inspected
- A quote for complete recertification is sent to you in accordance with our check-up report

- At receipt of your order, we proceed as follows:

- Thickness measurements
- Pressure Test (water, oil, nitrogen, etc...)
- Painting in accordance with your specifications

- A final report is sent to you after recertification, including:

- Operational certificates
- Pictures
- Pressure test charts & reports
- Our conclusions or advice concerning your equipment

Reception of loading arm in our mechanical workshop
Checking Phase

Recertified equipment: ready for shipment
Final control before shipment
